### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: No prior art, including the art of the previous rejection, Slater (US 2003/0015721), discloses that the inclined side areas adjoin a top side of the substrate which is remote from the radiation generating layer and parallel to the underside of the substrate. The inclined areas, shown in Figure 6 of Slater, adjoin the top side of the substrate at a non-parallel angle. Neither does any other prior art, including Slater, disclose the claimed device where the radiation generating layer, embodied as (30) in Figure 9 of Slater, for example, has beveled side edges which reflect the light emitted laterally with respect to the substrate in the direction of the substrate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
